

Condition Analyzer

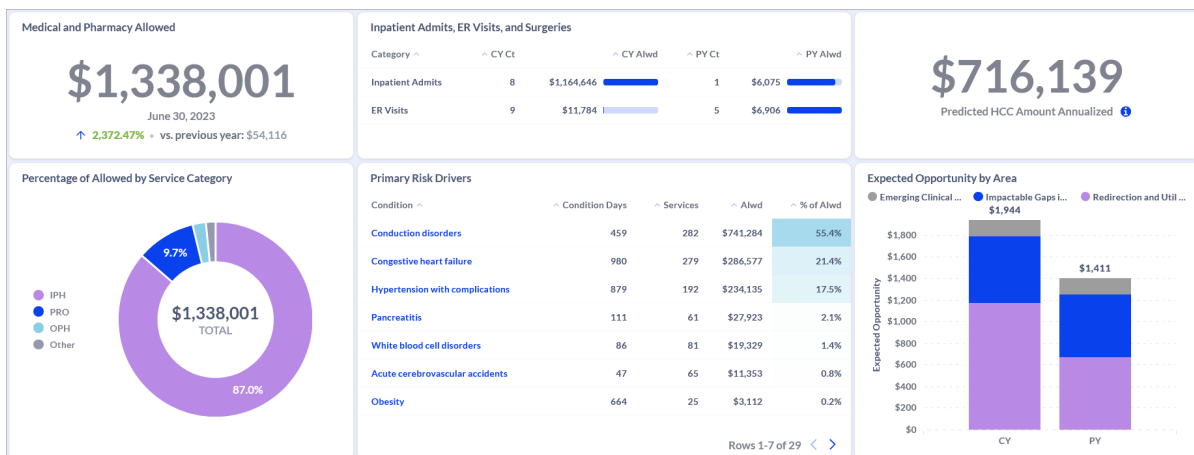

Identify the top conditions impacting your population and discover the largest saving opportunities.

At Certilytics, we are committed to providing AI-driven data and predictive analytic solutions that keep people healthier and make healthcare more affordable for all.

With the **Condition Analyzer** you can explore the specific diseases that are contributing to your total cost of care at the population level and by each individual.

- Improve your plan and design interventions based on the top conditions impacting a population and gain insight into cost by service type and drug spend.
- Better understand the total cost of managing and treating chronic conditions and how re-directing people to another service or pharmaceutical intervention can reduce overall spend.

Individual Detail Dashboard

KEY FEATURES

- ▶ A holistic view to understand the condition specific costs impacting a total population
- ▶ Compare and contrast the total cost of care for a condition to the total population
- ▶ Drill down to the individual level to show the total cost for someone with a particular condition
