

Enriched Healthcare Data

Benchmarking Data

Access massive data sets to compare, evaluate and improve performance.

► Our Approach

Today, every healthcare organization is facing increased pressure and even tougher competition when it comes to delivering more efficient and affordable healthcare.

At Certilytics, we understand benchmarking data can be very valuable in shaping a healthcare organization's strategies as it evaluates its performance and success compared to the healthcare industry as a whole. That's why we offer massive representative data sets to produce cost, utilization and other benchmarking across commercial, Medicare and Medicaid populations.

Here are some examples of the benchmarking data sets we offer our customers:

- Utilization Summaries by MSA and Provider Specialties
- Benchmarking by Condition Categories
- Benchmarking for Key Financial Metrics
- Benchmarking for NCQA Measures
- +More

About Us

An AI-driven Predictive Analytics Solution Built for Healthcare

For 10 years Certilytics has been delivering enriched healthcare data assets and predictive analytics to large healthcare organizations. These analytic assets are empowering leaders to drive more efficient and affordable healthcare.

Customer's trust us with their data because we have a tested and proven process for creating enriched healthcare data.
