# CERTHLM®

A unique healthcare-centric LLM for quickly uncovering valuable insights from your data.

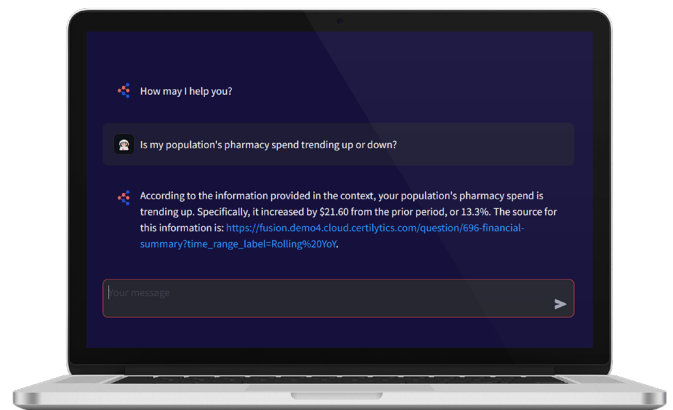

## ► Our Approach

At Certilytics we're committed to developing new innovations that will help healthcare organizations discover the unrealized potential of their data.

To help our customers derive value more quickly and efficiently from our AI-driven predictive analytic solutions, we have developed **CertHLM® a unique and healthcare-focused LLM.**

## ► What is CertHLM®?

- Integrated with our Health Intelligence Solutions through a “chat bot UI” users can pose complex text-based analytic questions, similar to ChatGPT
- It complements existing data integration features such as SQL query, WYSIWYG query builder, etc. and simplifies how users can discover insights in their data
- CertHLM® has three important proprietary characteristics:
  - The base LLM (Llama) is hosted on premise to avoid sending data externally
  - The base LLM has been fine-tuned and combined with a more tailored Certilytics HLM trained from the ground up
  - A vector database has been added for RAG to further supplement LLM knowledge

# About Us

## An AI-driven Predictive Analytics Solution Built for Healthcare

For 10 years Certilytics has been delivering enriched healthcare data assets and predictive analytics to large healthcare organizations. These powerful analytics assets are empowering leaders to drive more efficient and affordable healthcare.

### Unmatched Data Processing

**30M+** lives processed weekly
