certilytics

Enriched Healthcare Data

Supplemental Data Sets

Enrich existing data to improve predictions and uncover more valuable insights.

▶ Our Approach

Today, every healthcare organization has access to a vast amount of data. But, sometimes the data that is needed to solve for specific objectives or goals does not exist within an organization's own data sets.

At Certilytics, we are focused on delivering the most comprehensive and actionable insights for our customers — that's why we offer a comprehensive set of supplemental data. To create a powerful, AI-driven analytic asset, that will help improve predictive modelling, benchmarking, and reporting.

Here are some examples of the supplemental data sets we offer our customers:

- ▶ Program Management Data
- ▶ Mortality Data
- ▶ Drug Reference Data
- ▶ Provider Reference Data

About Us

An AI-driven Predictive Analytics Solution
Built for Healthcare

For 10 years Certilytics has been delivering enriched healthcare data assets and predictive analytics to large healthcare organizations. These analytic assets are empowering leaders to drive more efficient and affordable healthcare.

Customer's trust us with their data because we have a tested and proven process for creating enriched healthcare data.
